MOTION COMPENSATED CRANES

M-SERIES  L-SERIES  XL-SERIES

☑ Safe and efficient transfer of equipment to an offshore structure in harsh weather conditions
☑ Modular 3D knuckle can be easily exchanged with subsea and heavy lift knuckle for maximum operational flexibility
☑ Compensation of vessel motion by 3D knuckle in 3 degrees of freedom by horizontal, vertical and telescopic movement
☑ SWL 3D Active Motion Compensation: 1–20t
☑ Low power consumption
☑ Can be used on existing cranes
☑ Ship to Ship lifts
☑ High level of safety features
☑ In house workability analysis
☑ Operator training and maintenance services
☑ Certified according all major classification standards

SAFE AND EFFICIENT TRANSFER OF EQUIPMENT TO OFFSHORE STRUCTURES
ABOUT SMST

SMST offers a range of Motion Compensated Cranes: M, L and XL, varying in SWL from 1 up to 20t.

The range of Motion Compensated Cranes are part of the offshore systems that SMST develops and builds for both the wind industry and next generation oil and gas projects.

The complete offshore wind portfolio includes a range of gangways (telescopic access bridges) adjustable for various heights, modular offshore cranes with active and motion compensation, access & cargo towers, special handling equipment, seafastening frames and engineering studies.

KEY ASSETS

- Safe cargo handling
- Large operational window
- Significant wave height up to Hs 4.5m
- 3D Active Motion Compensation
- Excellent lifting capacity
- Easy exchange of 3D knuckle by modular set up
- Available for purchase or rent
